Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being unpatentable by Levine (6243030).

3. Reading claim 1 Levine teaches a portable information terminal comprising (fig. 3):

a display (19) part for displaying an image (fig.3, col.), lines 60-67);

an image signal receiving part for receiving an image signal to be sent via a mobile communication network (col.4, lines 51-67);

an image signal reproducing part which reproduces said image signal received by means of said image signal receiving part and makes said display part display said reproduced image (col.5, lines 8-38); and

a position detecting signal outputting part which outputs (col.3 lines 52-65), via a mobile communication network, a position detecting signal for making a judgment on an image-pickup part which sends an image signal to said image signal receiving part (col.8, line 65-col. 9, lines 18).

Reading claim 2 Levine teaches wherein said position detecting signal outputting part is a global positioning system (col. 3 lines 52-65).

Reading claim 3 Levine teaches wherein said portable information terminal is a portable telephone (fig. 3).

Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 4-20 the teaching of prior arts either alone or in combine fails to teach all limitations as recited claimed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Aranio (6522889) and Maruyama et al (6580999) teach apparatus for providing location information through a wireless communication network using a digital image of an object for comparing to geographical data stored in a local database.
